SUMMARY

Enthusiastic Computer Science graduate specializing in Artificial Intelligence and Data Engineering. Proven ability to transform raw data into actionable insights through hands-on projects, robust ETL pipelines, and advanced analytics. Skilled in SQL, Python, Alteryx, and Power BI, with a keen interest in building scalable data solutions and interactive dashboards. Adept at collaborating across teams, automating workflows, and delivering real-world impact through data-driven decision making.

EDUCATION

SRM Institute of Science and Technology

B.Tech Computer Science and Engineering (AI & ML)

8.26 CGPA

Chellappan Vidya Mandir International School

Karaikudi, Tamil Nadu

Senior Secondary (Class XII) - CBSE

7.9 CGPA

Chellappan Vidya Mandir International School

Karaikudi, Tamil Nadu

Secondary (Class X) - CBSE

8.16 CGPA

INTERNSHIP

AI & Machine Learning Intern

08/2023 – 09/2023

Teachnook (in association with Coratia Technologies), Remote

- Completed a mentorship in Artificial Intelligence, blending hands-on coursework with real-world mini-projects.
- Applied supervised and unsupervised ML using Python for data preprocessing, feature engineering, and model building.
- Collaborated remotely with mentors to solve practical AI challenges and deliver results in a team setting.
- Evaluated model performance and adopted new tools to address data-driven problems effectively.

PROJECTS

GDP360 – Macroeconomic Analytics Platform

SRM Hackathon 2025 | Technologies: Alteryx, SQL, Power BI, Data Visualization

- Designed and implemented a full end-to-end data pipeline to analyze 50 years of GDP and macroeconomic trends for 20+ countries.
- Built robust ETL workflows in Alteryx for multi-source data ingestion, cleaning, and normalization.
- Engineered advanced SQL scripts (CTEs, window functions) for GDP growth calculation, country rankings, anomaly detection, and sector dominance analysis.
- Developed an interactive Power BI dashboard with dynamic slicers, trend and sectoral charts, Top-N leaderboards, key KPI cards, and drill-through analysis.

Sleep Stage Classification Using Machine Learning

ML Health Analytics Project

- Built a sleep stage classifier from physiological sensor data (EEG, ECG, others) using Python, Pandas, and scikit-learn.
- Executed data preprocessing tasks including normalization, missing value handling, and label encoding on a large Excel dataset.
- Experimented with models like Logistic Regression, Random Forest, and CNN/LSTM for temporal signal classification.
- Evaluated model performance using accuracy, precision, recall, and confusion matrices, achieving 85–92% accuracy depending on the model.

Skills

Programming

- Python
- SQL
- C

Data Engineering

- ETL Pipeline
- Data Cleaning
- Data Modeling

Analytics & Visualization

- Power BI
- Alteryx

Database

Technologies

- MySQL
- SQL Server
- MongoDB

Soft Skills

- Problem Solving & Critical Thinking
- Communication & Teamwork

Business & Analytical Skills

- Data Analysis & Insight Generation
- Dashboard Development & Reporting
- Data Visualization & Storytelling

ACHIEVEMENTS

Hackathons

Digithon 2.0

Developed a mobile app to track and reduce carbon footprint using AI-based suggestions and gamification.

- Developed a smart platform to monitor and promote eco-friendly habits such as reducing electricity and plastic consumption, waste management, and sustainable transportation.
- Achieved a **Top 5 team placement** among competing projects for innovation and impact.

SRM Hackathon 8.0

Built an ML-integrated project under time constraints, focusing on real-world impact.

Certifications

Power BI for Data Analysis (Microsoft Learn)

- Designed a dashboard to analyze sales performance using Power BI
- Applied Power Query for data transformation and DAX for calculated fields
- Visualized KPIs like revenue, profit, and customer growth over time

Fortinet Certified Fundamentals in Cybersecurity

Fortinet | Certificate ID: 2589070130HH | Feb 2025

AWS Machine Learning Foundations
